**The Day I Met a Monster**  
**Alex Constantinou, 4<sup>th</sup> grade**

I was walking to school when I saw this monster who horrified me! He had a piece of graph paper instead of a head. I thought he was only a foot tall and a few inches wide. His spine was a math problem that had a lot of numbers. His right hand was a blue colored pencil, and his left hand was a scissor. His heart was located in the scissor on his left arm. His right leg was a bright green ruler, and his left leg was a pencil. As he walked toward me, I decided to be friends with him. So, I took him with me to school.
